Experience

Cyral
Product Designer

Aug 2021 - Aug 2024

- As the 1st design hire at Cyral, I **collaborated directly with engineering teams, product managers, and VPs to define UX requirements and design strategy for all product features**.
- **Established and maintain design system library in Figma,** partnering closely with frontend engineers to ensure seamless implementation and design-to-code handoff.
- Designed Data Access Portal in collaboration with product and engineering teams used by **enterprise** (Informatica, Verisk, Vanguard) and **SMB customers** (Marqeta, Hims & Hers, Vanta) to provide **password-less federated access to databases for data consumers**.
- Drove alignment with product managers to design an access request workflow to enable database consumers to request just-in-time access to databases; this feature was key in **closing deals totaling $750k ACV to date**.
- Collaborated with engineering and customer success teams to design Data Access Policy Wizard enabling security teams to define fine-grain authorization policies through a point-and-click interface; improved **technical win rate for PoCs contingent on policies from 34% → 80%**.

Soestern Packaging
Designer, Contract

Jun 2019 - Feb 2020

- Designed high-fidelity mockups for the first iteration of a revamped e-commerce website.
- Designed the user interface for automated production machinery that assembles roll-packaging.
- Updated product ID's and prices for over 200 products on the e-commerce site using Magento.
- Handled data for production orders using Excel.
